Garage Management System (GMS)

The **Garage Management System (GMS)** is a Salesforce-based solution designed to streamline operations in automotive repair facilities. It helps manage customer details, appointments, service records, and billing information efficiently, providing a better experience for both the staff and customers.

Features

- **Customer Management**: Store and track customer details with ease.

-

- **Appointments**: Schedule, view, and manage service appointments.

- **Service Records**: Keep a log of all services provided to the customers.

-

- **Billing & Feedback**: Manage payments and gather customer feedback.

- **Reports & Dashboards**: Visualize data through custom reports and dashboards.

Technologies Used

- **Salesforce**: Platform used for building the entire system.
-
- **Apex**: Used for service amount distribution automation.
-
- **Flows**: Automate processes like payment tracking and email notifications.
